

Triton

The ultimate best-ex platform

Virtu's next-gen Triton EMS offers a world-leading suite of pre-trade, real-time and post-trade analytics; a robust workflow and notifications toolkit; and a highly configurable, user-friendly interface.

The Triton platform addresses the major EMS issues we've heard from buy-side traders over the past few years:

- **Faster upgrades**—Click-once packaging, ensures you can rapidly take advantage of new EMS features and functions as they become available, without complex, onerous upgrade cycles.
- **High configurability**—Personal layouts, configurations, settings and plug-ins are hosted server-side for increased mobility, consistency and improved resiliency.
- **Portability**—Triton's intuitive user interface enables on-the-fly creation of hot buttons, filters, alerts, color schemes (skins), zooming, font-size settings and layouts.
- **Modular architecture**—Net framework lets you freely open, float, dock, link and save multiple windows and views across monitors to maximize screen real estate.
- **Robust multi-asset capabilities**—Global equity, single stock, list, basket and pairs trading; indications of interest; detailed futures pads; full options sheets with spread, delta and vol trading; FX algorithmic and RFS trading; fixed income routing with full RFQ functionality.
- **Integrated analytics**—Enhanced global pre-trade, real-time and post-trade analytics to assist you with decision making while helping you minimize risk and assess performance.

LIQUIDITY, REGION AND ASSET WORKFLOWS

You can tailor your workflow and even apply the most effective trading workflow method for each asset class, region and liquidity profile. For example, you can leverage IOIs and conditional orders for small-cap equities, request-for-quote (RFQs) for negotiated instruments and structured products, or request-for-stream (RFS) for FX trading. Triton also offers integrated commission management, operations and compliance.

EXPERT SUPPORT IN EACH REGION

Virtu's regional support desks and expert consultants can help you create performance-driven trading processes, design auto-routing rules and alerting conditions, view estimated trading costs, conduct what-if scenarios, monitor trading strategies in real time, identify outliers and analyze the implications of different execution strategies post-trade, over time.

TRADE COST PEER BENCHMARKING

To gain relevant insight and context, you can tap into Virtu's Global Peer database to help you determine costs at the point of trade.

Triton Global List Trading

Manage global lists through the Triton next-generation multi-asset EMS.

ABOUT VIRTU

Virtu is a leading financial firm that leverages cutting edge technology to deliver liquidity to the global markets and innovative, transparent trading solutions to our clients. As a market maker, Virtu provides deep liquidity in over 25,000 securities, at over 235 venues, in 36 countries worldwide that helps to create more efficient markets. We leverage our market structure expertise and scaled, multi-asset technology infrastructure to provide a complete suite of client solutions, including transparent agency execution and broker-neutral offerings.
